- MYSQL
- Problem Solving
- Java
- DOM Manipulation
- Redux

PROFILE

Objective
Experienced Front-end React JS developer with a passion for innovation, adept at building websites from scratch with modern technologies. Seeking opportunities to contribute to dynamic projects.

WORK EXPERIENCE

Remote React JS Developer
Jan 2020 - Oct 2023
During my tenure as a Remote React JS Developer, I independently designed and developed impactful projects from scratch:

Social Media Web Platform
Dynamic social media platform that encouraged user interaction through profiles, news feeds, posts, and notifications.

Freelance Website
Internet-based platform for on-demand technical and software services, including opportunities for user skill enhancement and seamless software service delivery.

Car Maintenance System
Designed a platform to connect vehicle owners with local workshops, enhancing maintenance efficiency, and fostering seamless communication

Service Request Simulator
Developed a platform enabling users to request free maintenance and work services, interact with their past projects, and connect with workshops and service providers seamlessly

EDUCATION HISTORY

Bachelor of Software Engineering, Damascus University, Syria.
2018-2023
Honors: Top 2 Projects in Software Engineering Department Exhibition
